Here at Firstflex Aflex Cables we are passionate about providing cables of the highest quality, and we will continue to offer cables that set the standard for industrial performance.

But we are also often asked if we are able to offer a medium duty alternative for applications where a lower specification cable will suffice.

To meet this demand we now stock a large range of **Medium Duty** cables at very competitive prices.

These include the new flexible single core BFX Series Power & Pumping cable, the flexible BGL earth cable, and a large range of the versatile ML series medium duty multi core light industrial flexible cable.

Plus we now offer the all new OXEMC Copper Tape Screened VSD fixed wiring cable and FR & FRCY Fire Rated screened and unscreened cables.

We have an excellent stock holding of a large range of sizes with all cables available by the metre.

### MEDIUM DUTY

#### BFX

SERIES

SINGLE CORE SDI
