**Operating Temperature Range** -40°C to 100°C. Up to 120°C for short periods.  
**Protection Class** Water rating IP68. Pressure rating 10 bar.

**INSTALLATION:**

- ▶ Strip/cut approximately 15mm of sheath exposing the copper braided screen or copper tape. Note: The sheath may continue until the point where termination tails are required.
- ▶ Compress gland in position until the metal terminal insert makes firm contact with the screen.
- ▶ To establish an electrically conductive connection to bare or painted metal surfaces or enclosures - use an LNEMC LOCKNUT which has cutting teeth to bite into the metal.

## CLWM SERIES

### Wide Mouth Crimp Lugs

When a bell mouth crimp lug is used in conjunction with a flexible conductor, it is recommended to use the same size crimp lug as per the conductor. i.e. use CLWM120 (120mm<sup>2</sup>) crimp lug with 120mm<sup>2</sup> flexible cable. For crimping 6mm<sup>2</sup> to 120mm<sup>2</sup> lugs you can use either a manual tool or 13 tonne hydraulic crimp tool. For 150mm<sup>2</sup> flexible conductors and above, use a 23 tonne hydraulic tool.

For easier termination of fine stranded cables. **Compliant with Standard AS/NZS 4325.**
